## To the Reader.

**R** Eader, The last year our Prognostications did perform what could be expected from a Work of that Nature : The great Actions of the Northern Kings ; to wit, Sweden and Denmark were hinted sufficiently : the late Change amongst us here in England, exactly was by us fore-told ; the unhappy undertakings of the Cheshire and Lancashire People, and divers other things, not a few, were according to Art predicted, and accordingly came to pass : We have here presented Thee with the like Predictions, upon this Year, 1660: We heartily wish, that the Evil that is threatened may be turned from us by Prayer unto the Almighty, who hears the Cryes of the Beasts of the Field when they are lifted up unto him. Much of our evil that will befall us, is like to be occasioned by the evil minds of some in Power. It is not convenient nor safe to particularize either persons or things : therefore we shall take the Liberty to set forth things in the modest and most generall terms, that thereby we may avoid offence and danger, that other wises will fall inevitably upon us. Likewise, Reader, thou art here presented with most excellent Receipts for many things Physicall : we are not ignorant what abundance of good hath been done by the Rules of Physick we have formerly published; most of those tended to the good of Generation. These, here published, tend to Preservation : A Thing of no less value and necessary. They are the best Receipts that are extant, in any private or publike hand : Of which, Reader, thou mayest be assured ; in regard that those former Receipts and Instructions touching Generation, were not large enough ; nor would such a

Work

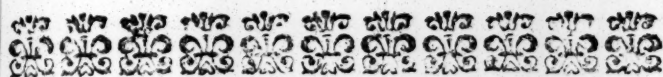

To the Reader, &c.

work permit us to be so large as otherwise we should have been: therefore, we refer Thee to that incomparable and most excellent piece of all other of that Nature; entituled, The secret Miracles of Nature, written by Lemnius. wherein Generation is fully described, the wayes and means. Also, Rules to use it with moderation, that thereby be Heer to be not impaired. Likewise, the best Rules to prevent Barrenness. Also, a Rule to get Boyes or Girlen, which is most desired. With innumerable Rarities, and Secrets of Nature.

Reader, I take my leave of Thee, promising to serve Thee without respect to any thing, less or more, than common good.

S. J.

---

A  
P R O G N O S T I C A T I O N  
F O R  
The Year, 1660.

*Physical Observations.*

A Water good for Sun-burning.

**T**ake water drawn off the Urine dropping,  
the flowers of white Thorn, Mear flowers,  
Water-Lilly flowers, Garden Lilly flowers,  
Elder-flowers, & Cansie flowers. Althoe flowers,  
the whites of Eggs, French Barley.

To write Letters of secrets, that they cannot be read  
without the Directions following.

Take fine Allum, beat it small, and put a reason-  
able quantity of it into water; then write with  
the said water. The work cannot be read, but by  
steeping the paper in fair running water. You may  
likewise write with Vinegar, or the juice of Lemon  
or Onion. If you would read the same, you must  
hold it before the fire.

## A Prognostication

To take away Freckles, or Morpew.

Take Hogs grease that is not tyed, and beat it with a Pestle, and spread it upon a piece of white Cotton, on the rugged side, and bind it on the coming, dressing it once or twice a day, and it will wear them away.

To make the Face fair.

Take fresh Bean blossoms, and distil them in a Limbeck, and with the water wash your Face.

For Heat or Pimples in the Face.

Take the Liverwort that groweth in the Well; stamp and strain it, and put the juce into cream, & so anoint your Face as long as you will. and it will help you, Proved. Also, the juce of Liverwort, drunk in Beer warm, is good for the heat of the Liver.

Dr. Frier's Receipt for sweating in the Face.

Take a little handful of penny-royal, & as much Cinquefoil, and seeth them in white wine or Vinegar: If you take vinegar, put a little to it when it is sodden: this done, you must hold your head, and keep in the air close, as long as you can indure it, and so 10 or 12 times a day.

To take away Hair.

Take the Shells of 52 Eggs beat them small, and still them with a good fire, & with the water anoint your self where you would have the hair off; or else Cats dung that is hard and dyed, beaten to powder and temper'd with strong vinegar, and anoint on the place.

To make Childrens teeth come without pain: proved.

Take the head of a Hare boiled or roasted, & with the brains thereof mingle Honey and Butter, and therewith anoint the childrens gums, as often as you please.

for this present year, 1660.

A Syrup for a Cold.

Take penny-royal half an ounce, Baylines of the Sun stoned one ounce, half so much Liguorice bruised; boil them in a pint of Running water, til half be consumed: then Strain it out hard, and with Sugar boil it to a pretty thick Syrup, and take it with a Liguorish Stick often, Proved.

Wormwood Cakes good for a cold Stomach, and to help Digestion.

Take pure scarced Sugar two ounces, and wet it with the Spirit of Wormwood; then take a little Gum Tragacanth, and steep it all night in Rosewater: then take some of this and the wet Sugar, and beat them together in an Alabaster Mortar, til it come to a Masse like Dough: if you please, put a little Musk to it; then make it up in little cakes, of the breadth of a goat, or three pence: lay them upon plates, and dry them gently in an Oven, and keep them in a dry place for your use; and upon occasion, hold one of them in your mouth to suck, & swallow the dissolved juce thereof for the Infirmities aforesaid.

For a Tetter.

Take water of Red-Tar, and wash it therewith: this is an approved Remedy.

To cure the Rickets in Children, approved.

Take a quart of new Milk, put into it one handful of Sannicle; boil it half away, and give it to the diseased child to drinke in morning for a breakfast, and let it not eat any thing for an hour or two after it; and at night take a quart of milk, & one handful of Red Mints: boil it half away before, & let the child eat it last at night: this continue for a month, or longer as occasion is: this quantity of milk so made, will serve for twice.

## A Prognostication

A Medicine for a Child that cannot hold  
his or her water.

Take the Nabil string of a child which is ready  
to fall from him, dry it, and beat it to powder, and  
give it to the patient child, male or female, in two  
spoonfuls of small beer, to drink fasting in the morn-  
ing. A Remedy for Worms in Children.

Take one spoonful of juyce of Lemons poude'd,  
Saffron half a couple, and a little sugar; & give  
this same quantity to the patient three mornings  
together.

A Receipt to help Digestion.

Take two quarts of small Ale, put to it Red  
Wints one handfull as much of Red Sage, a little  
Cinnamon: let it boil softly, till half be waisted:  
sweaten it with Sugar to your taste, and drink  
thereof a draught morning and evening.

A precious Water to revive the Spirits.

Take 4 gallons of strong Ale, 5 cuneces of Wints  
seeds, Liguorish scraped half a pound; of sweet  
Wints Angelica, Bereny, Cowslip flowers, Sage  
and Romanay flowers, sweet Marjoram, of each 3  
handfulls; Pellitory of the wall, one handfull. After  
it is for 2 or 3 days, distil it in a Limbeck, and in  
the Water insinuate one handfull of the flowers afores-  
said; Cinnamon and Fennel seed, of each half an  
ounce, Janiper berries bruised one dram, Red-rose  
buds, roasted Apples and Dates sliced and stoned,  
of each half a pound. Distil it again, and sweeten it  
with some Sugar-candy, and take of Amber-  
greace, Pearl, Red-coral, Harts horn powder'd and  
Leaf Gold; of each half a dram: put them in a fine  
linnen bag, and hang it by a thread in a glass.

For the Stone and Chollick.

Take the quantity of half an Hazle-nut Kerne l,  
and Methydate, and so much black Soap, & mix  
them

for this present year, 1660.

them together, and take a broad Dason, cut off the  
top, and make it somewhat hollow, and put the  
black Soap and Hydride in it, and cover it with  
the piece you cut off; wrap it in papers, and roast it  
in Embers, until it be very soft: then put it be-  
tween two linnen cloaths warm, and lay it to the  
Nabel, and pin the cloaths upon the back: so use  
it til you find ease.

To skin the rawness of a Womans Nipple.

Take a Dears foot, and take the marrow thereof,  
and anoint the Nipple therewith.

An approved Medicine to beautifie the Face, or to  
take away pimples or heat in the  
Face.

Take a fair Earthen pipkin, and put into it a  
pottle of clean running Water, & an ounce of white  
Mercury beaten to white powder: then set it on the  
fire and let it boill until one half be consum'd and  
keep it close covered, saving when you stir it: then  
take the whites of six new laid Eggs, beaten half  
an hour or more, and put it to the Liquor, after it  
is taken from the fire. You must put in also the  
juice of Lemons, being very good, and half a pint  
of new Milk, and a quarter of a pound of bitter  
Almonds, blanched and beaten with half a pint of  
Damask Rosewater: strain all these together  
through a strainer, and let it stand 3 hours before  
you use it, and I will warrant you fair &c.

An excellent Water for the Eyes that are red or  
full of Rheum.

Take young Hazle Mats when they are so soft  
that you may thrust a pin through them: fill them  
in a Rose Still Husks, shells and all, and wash  
the water with your Eyes.

For the Teeth.

If you will keep your Teeth from rotting, wash  
the mouth continually every morning with juice

## A Prognostication

of Lemonds; and afterwards rub the teeth with Sage-leaf, and wash the teeth after meat with fair Water.

To cure the Tooth-ache.

First take Mastick and chew it in your mouth, till it is soft as wax; then stop the teeth with it, if hollow, there remaining till it is consumed, and it will certainly cure you.

Secondly, the tooth of a dead man carryed about a man, presently suppresses the pain of the tooth.

Dr. King's way to make Mead.

Take five quarts and a pint of water & warm it, then put one quart of honey to every gallon of liquor, one Lemon, and a quarter of an ounce of Nutmegs; it must boill till the scum rise black, that you will quickly have it ready to drink; squeeze into it a Lemon when you turn it; it must be cold before you turn it up.

To make Gilly flower wine.

Take two ounces of dried Gilly flowers, & put them into a pottle of Sack, and beat 3 ounces of sugar-candy, or fine sugar, and grind some Ambergreace, and put it in the bottle, and shake it oft, then run it through a Gilly-bag, and give it for a great Cordial, after a weeks standing; or more. You make Labender wine, as you do this.

A good Stomach water.

Take white wine one pottle, Rosemary and Cowslip flowers, of each one handful, as much Westony leaves, Cinamon and Cloves grossly beaten, of both one ounce. Steep all these 3 days stirring it often; then put to it Sythridate 4 ounces, and stir it together, and distill it in an ordinary Still.

for this present year, 1660.

Water of Time for the passion of the Heart.

Take a quart of white wine, and a pint of sack,  
steep it in as much broad Time as it will wet: put  
to it of Galin- Gall and Calamus Aromaticus, of each  
one ounce; Cloves Mace, Ginger, and grains of  
Paradise 2 drams; steep these all night: the next  
morning distill it in an ordinary Still, and drink it  
warm with sugar.

An admirable Water for sore Eyes.

Take Lapis Tutia, Aloes Hepatica fine hard sugar,  
of each 3 drams; beat them very small, & put them  
into a Glass of 3 pints: to which put Red-Rose  
water and White-wine, of each one pint: set the  
glass in the Sun in the month of July, for the  
whole month: shaking it twice in one day for all  
that while: then use it as followeth; put one drop  
thercof into the Eye, in the Evening, when the pa-  
ty is in bed, and one drop in the morning, an hour  
before the Patient wakeneth: continue the use of it till  
the Eyes be well: the older the Water, the better  
it is. Most approved.

A Snail-water for weak Children, and old  
People.

Take a gottle of Snails, and wash them well  
in 2 or 3 Waters, and then in small Water; bruise  
them Shells and all: then put them into a gallon of  
Red-cows milk Red-rose leaves dyed, the whites  
cut off Rosemary, Sweet Marjoram, of each one  
handful; and so distill them in a cold Still, and let  
it steep upon powder of white Sugar-candy: in the  
Receiver, drink of it first and last; and at 4 a clock

**A Prognostication**  
in the afternoon, a Wine glass full at a time.

Dr. Montford's Cordial Water.

Take Angelica leaves 12 handfuls; Six leaves of Carduus Benedictus, Balm and Sage, of each 5 handful, the Seeds of Angelica and Sweet Fenel, of each five ounces bruised: Liqueurish 12 ounces, Aromaticum Rotatum, Diamoscus Dulcis, of each Six drams, the herbs being cut small, the Seed and Liqueurish bruised: infuse them into 2 gallons of Canary Sack for 24 hours: then distill it with a gentle fire, and draw off onely 5 pints of the Spiritus, which mix with one pound of the best Sugar dissolved into a Syrup, in half a pint of pure Red-Rose Water.

Clarey Water for the Back, Stomach, &c.

Take 3 gallons of mashing beer, put it in a great brass pot of 4 gallons, and put to it 10 handfuls of Clarey gathered in a dry day, Raisins of the Sun Rind, 3 pounds; of Quinsets and Liqueurish, of each 4 ounces; the whites and shells of 24 Eggs, or half so many, if there be not so much need in back, beat the shells small, & mix them with the whites; put to the bottoms of 3 whites loaves, put into the Receiver one pound of white Sugar candy, or so much white Sugar beaten small, and distill it through a Limbeck, keep it close, and be seldom without it; for it relieveth very much the Stomach, and heart, strengthneth the Back, procurath Appetite and Digestion; driveth away Melancholy, fatness, and heaviness of the heart.

for this present year, 1660.

Aqua Mirabilis : Sir Kenelm Digby's Way.

Take Cubebs, Gallingale, Cardamus, Mellilot-flowers, Cloves, Mace, Ginger, Cinamon, of each one dram bruised small ; Iuyce ofcelandine one pint, Iuyce of Spearmint half a pint, Iuyce of Balm half a pint, Sugar one pound Flower of Cowslips, Rosemary, Borage Bugloss, Marigolds, of each two drams, the best Sick three pints, strong Angelica-water one pint, Red-Rose water half a pint : bruise the Spices & Flowers, and steep them in the Sack and Iuyce one night ; the next morning distill it in an Ordinary, or Glass Still, and first lay Harts-tongue leaves in the bottom of the Still.

The Vertues of the precedent Water,

This Water preserveth the Lungs without grievances, and helpeth them being wounded ; it suffereth not the blood to putrefie, but multiplieth the same : This Water suffereth not the Heart to burn, nor Melancholly, nor the Spleen to be lifted up above Nature : it expelleth the Rhume, preserveth the stomach, conserveth Youth, and procureth good colour : it preserveth Memory ; it destroyeth the Palke : If this be given to one a dying, a spoonfull of it reviveth him : In the Summer, use one spoonfull a week tasting ; in the Winter, two spoonfulls.

Marigold Flowers distilled, good for the pain of the Head.

Take Marigold flowers and distill them, then take a fine cloth, and wet in the aforesaid distilled water, and so lay it to the forehead of the Patient, and bring

## A Prognostication

being so applyed, let him sleep if he can : this, with  
God's help, will cease the pain.

### The Lady Gifford's Cordial-water.

Take four quartes of Aqua-Vitæ, Borage, and  
Poppy-water, of each a pint, two pound of Sugar-  
Candy, one pound of Figs sliced, one pound of Raisins  
of the Sun stoned, two handfulls of Red-Roses clipped  
and dried, one handfull of Red-Hints half a hand-  
full of Rosemary, as much of Hyssop, a few Cloves ;  
put all these in a great double Glass, close stopp'd,  
and set it in the Sun three moneths, and so use it.

A Water for the pensive and very Scke, to comfort  
the Heart, very excellent.

Take a good spoonfull of Mimus Christi, beaten  
very small in a powder ; then take a quarter of a  
pound of very fine Sugar, and beat it small, and  
ix spoonfulls of Cinnamon Water, and put to it, and  
10 spoonfulls of R. d. Rose Colater : Mixe all these  
together, and put them in a Dish, and set them over a  
soft fire, five or six Walms, and so let it be put into a  
Glass, and let the party drink thereof a spoonfull or two  
as he shall see cause.

### A Cordial water of Sir Walter Raleigh.

Take a gallon of Strawberries, and put them into  
a pint of Aqua-Vitæ, let them stand 4 or 5 days,  
Strate them gently out, and strain the Water as  
you please with fine Sugar, or else with Idesume.

for this present year, 1660.

The Countess of Monteaigles excellent Medicines  
for the Cramp, Proved.

Take a handful of the Herbe called Periwinkle, some of it beareth a blew Flower, and some white. And also take a good handful of Rosemary tops, put them into a Pewter Dish, and set them upon coals; dry them, and turn them very often; and when they are very hot, lay them upon the place that is so taken with the Cramp, and bind a cloth upon them when you go to bed, and this will help you: take it in the morning, and lay it fresh at Night.

For a Pin and Web in the Eye far gone.

Take the Marrow of a Goose Wing, and mingle the Powder of Ginger therewith; dress the Eye therewith two or three times a day.

A Medicine for the Eye aching, or Redness  
thereof.

Take a Small Glass, and fill it full of fair running Water, and put into it fine Sanguis Draconis, the quantity of a Hazle Nut; it will help the Eye.

The Lord Spencer's Cherry-water.

Take a Bottle of New Sack, four pound of thorough ripe Cherries stoned; put them into an Earthen Pot to blanch; put an ounce of Cinnamon, Saffron unbruised on: draine tops of Bala, Rosemary, or their Flowers, of each one handful: let them stand close covered 24 hours, shake and then  
strring

## A Prognomication

Stirring of them: then put them in a cold Still, to be put of beaten Amber two drams, Cozander seed one ounce. Alkerns one dram, and distill it leisurely; and when it is fully distilled, put to it 20 grains of Musk. This is an excellent Cordial for the faintings and swoonings, for the Crudities of the Stomach, Wind, and Swellings of the Bowels.

### Water of Time, for the Passion of the Heart.

Take a quart of White Wine, and a pint of Sack, steep in it as much broad Time, as it will wet: put to it of Galia ale, and Calamus Aromaticus, of each one ounce; Cloves Mace, Ginger, and Graines of Paradise two drams; steep these all night: the next morning distill it in an ordinary Still; drink it warm with Sugar.

### Of Ruptures.

The general kind of Ruptures are three, Aquosa or watery: this is usual in Dropsies, when much water is descended into the Cods, which causeth them to swell. Ventosa or a windy Rupture, that is when great store of wind is gathered into the Purse of the Testicles. And Carnosa, or a fleshy Rupture, which is caused either by the Excremental growing of flesh in the Cods, or by the falling of the intestines into the Cods, the film or skin that should keep them up being broken.

*Hernia, or Burseness, is also thus defined.*

Hernia, or a Rupture, is properly said to be, when any tumor appears in the purse of the Testicles, proceeding either from something descending into the Cods, or from some matter growing there, and causing the same to swell.

The

for this present year, 1660.

*The cure of a watery Rupture.*

The cure of a watery Rupture requires a two-fold intention, one is to take away the Antecedent cause, which is a hegematiack watery matter, springing from the Liver by reason of this generation. The second intention is to dissolve that Aquosity, which is in the Cords, or to draw it out by perforation. The first intention is performed by abating the matter digesting and eradicating it.

*Digestive Pills.*

Take Pill Aggregative, Pill. de Rhabarb Māne, of each one scruple, prepare thereof Pills with Syrup of Marsh-mallows.

*Others if it proceed from the Head.*

Take Pill, Chachie, Surer. of each one scruple, make Pills thereof, and let the Patient take them going to bed.

---

*Of the Eclipses this present Year.*

**T** Here will be presented this Year to the view of the Earth's Inhabitants three Eclipses; two of the Moon, and onely one of the Sun: neither of which can be conspicuous in our Horizon, and therefore I hold it needless to insert either their Calculations, or Types, as they will appear.

The first is a very great and total Eclipse of the Moon upon Palm-Sunday, the 15 of April, near 9 in the morning, continuing about 4 hours eclipsed; but it cannot be seen of us in England, because at the time thereof the Moon is far under our Horizon; but it is to be seen in Japonia, Luconia, the Molucca, and Philippine Islands, and Islands of the Chimensis Ocean, de la Aguada, and Islands of Solomon; as also in California, Virginia, New-Spain, Mexico, the Straights of Anian, Barbados, Nova

*Gambia,*

### Of three great Eclipses.

Guinea, *Parwana*, the Province of *Chili*, *Florida Insula*, *Granada*, in the Islands *De los Mongos*, *De los Tubarones*, *Maré del Zur* &c.

The second is a very small Eclipse of the Sun, on Sunday April the 29. at 6 in the morning; which Eclipse being not fully two Digits, and to be seen onely in *Magellanica*, and those Southern parts of the Earth unknown to us, near the Antartick Pole; I forbear to mention it further.

The third is a total Eclipse of the Moon, on Monday the 8. of *October* at Noon, which will be seen of our Antipodes and Perieciis, in *Nova Guinea*, *Insulis Salomonis*, *de la Aguada*, *de los Tubarones*, *Los Mongos*, *le Vizina*, *Barbados*, *Java*, *Sumatra*, *Eorneo*; and in the *Luccha*, *Brach*, and *Malsur Kingdoms*. She will be seen to rise eclipsed of them, who inhabit the Southern *India*, the *Arabick Ocean*, and *Gulfe of Bengala*. On the contrary, those people may perceive her set, who live in *Nova Hispaniola*, the *Gulfe of Mexico*, *Florida*, and in the Regions of *Parwana* in *America*.

*Andreas Argolas* speaks of two other Eclipses this Year of the Sun: the one, upon the third of *October* (*sylo novo*) at 22 ho. 34. P. M. The other, on the second of *November*. 12. ho. 48. But I can discover no such Eclipses by Astronomical Calculation to be seen in any part of this Earthly Globe.

## January *Astrological Observations.*

**S**everal men of good wit and Genius will rise; but when risen, they have no Lease of their Honours: There is nothing here that is permanent. Some that are Well-wishers to Religion, and Religious men stir, but to little purpose. The Ignorance and Malice of some I ye still, like a Dog in a Manger. Little action, but much Debates and Consultations, tending to Action. If any be, it will break forth with much violence. Some are struck with blindness of the Eyes; but more with blindness of the Mind.

### *Observations for the good Husbands and good Housewives.*

Plow for Pease, fallow such land as you intend shall rest the year following; water your barren Meadows Pasture, and drain arable ground, especially if you intend to sow Pease, Oats, or Barly the seed time following: also stub up all rough grounds, trim up your Garden moulds; The weather calm, remove all manner of fruit trees, rear Calves, remove Bees, keep good Dyet.

## February, *Astrological Observations.*

**T**he Husband-man is prevented by unreasonable weather. Those that marry this Moneth run much danger of bearing hereafter the contempt of the world; you know what I mean. The Soldiers decline in Reputation, and grow weak in the opinion of most men: the Nation strugleth to arrive at Liberty; but particular Interest preventeth it as yet.

## A Prognostication,

### *Observations very useful and profitable.*

Set Beans, pease, and other pulse in stiff ground. begin the soonest, prepare your garden, prune and trim your fruit trees from Moths, Cankers, and superfluous branches, plash hedges, lay your quickset close, plant Roke, Gooseberry trees, and any other shrub trees, and graft your tender stocks: forbear all phlegmatick meats.

### *March, Astrological Observations.*

**I** will not say positively that the Sword shall be drawn this Moneth: But I will say, if it be not, I shall admire the contrary: and if not this moneth, it will be, ere long. Some will fall by the Hand of Justice, or at least by those then in Power. Who they will be is hard to conjecture; the Heavens are silent as to Names: It is not long ere we shall see those Effects which we shall have cause to lament. Ambition and private Interest, hath drawn this upon our Heads,

### *Observations very useful and profitable.*

Look well to your Trees, cut up underwood or felled, transplant all sort of summer flowers, comfort them with good earth, especially the Crown Imperial, Marigold, Tulips, and Hyacinth; in your barren fruit trees, bore holes and drive hard wedges of Oak, and cover roots of trees close with fat earth that are uncovered; graft fruit trees and sow Dates, Rye, and Barley. Let your Diet be cold and temperate.

### *April, Astrological Observations.*

**U**nconstant will the Affairs of the World be, at this present. Princes and States will be uncertain in their Resolutions, whom to joyne with,

for the year, 1660.

Confederacies; and People, will be as uncertain who to joyn with and adhere to, or from whom they may expect Protection : All things seem to be dis-joynted, and discomposed. I know not what this Month is good for else, than to marry in it : the Woman will be fruitful, and the Man more constant than ordinary.

*Observations very profitable and useful.*

Sow your Hemp and Flax, sow and set all sorts of Herbs, open your Hives, and give your Bees their liberty and let them labour for their living ; cut your Oake Timber, the bark is best for the Tanners use. Sow your ditches, gather your Manure together, in heaps, gather stones, repair high-waies, set Driers and Wind-lows, and cast up all decayed Fences. For your health, use moderate exercise.

*May, Astrological Observations.*

A Great stir about Law and Religion will be this Month ; but the Common Enemy the Jesuit, would not onely pervert both, but also deprive us of both, New Sects of Religion start up, or else new and unwelcome Opinions amongst us ; which will very much disquiet and discompose our Affairs in the future. France, Germany, and Spain, shall taste of the same Dish : the Turk intendeth to advance further upon Europe.

*Observations very profitable and useful.*

Fold your Sheep, carry forth Manure, and bring home fuel : weed winter Corn, furnish your Dairie, let your Hares go to Horse, fat your dry Kine, and away with them ; sow your tender seeds as Cucumbers, Melons

## A Prognostication,

Itone, "all sweet kind of heacbs and flowers. For yone health drink clarified whey.

### June, *Astrological Observations.*

**O**ur Malevolent Miseries seem to be somewhat abated, that causeth some joy, but it lasteth not long: We immediatly have new matter to exercise our wonder and fears, not only of what is at home, but also of what happeneth abroad.

### *Observations very profitable and useful.*

Distill all sorts of Plants and Herbs whatever. Cut your rank Meadows, fetch home felwel, and carry forth Manure, Hauke, and Lime to mend your Land: Be sure to be chaff this Month, what ever you are the rest of the year.

### July, *Astrological Observations.*

**G**OD hath a just quarrel against vs, and our Ruine is near at hand; if He himself doth not watch over us, we shall be miserable men, not to be trusted unto; A fault this Nation is too much guilty of. Women miscarry, and dye in Child-bed: Diseases amongst Children rise: the small Poxe are more mortal than ordinary: seberal make away with themselves by hanging, drowning, stobbing, or poisoning themselves; and the like at the latter end of this Month a ♄ ♃ & ♅,

for the year, 1660.

*Observations very profitable.*

Attend your May harvest, shear field Sheep: let the  
heards you intend to preserve run to seed; cut off the  
stalk of your flowers, and cover the roots with new fat  
earth: sell your Lambs you intended for the shambles.  
Take no physick, unless in extraordinary cases. refrain  
wenery.

*August, Astrologicall Observations.*

Embassies are set on foot by Treaties and Embas-  
sages, to compose Differences of State; but they  
prove but Delatory. Use Exercise moderately,  
it bring Weakness upon Nature: the poor  
are the merriest now; for their Condition is not  
touched by the Evil of this present time. Pray God it  
may not become a Crime amongst us, to be rich or  
virtuous; The Nation will at last be delivered, and  
become happy. But I cannot promise it in this Month  
or the next; although I hope that something may  
happen, that will prove an Introduction to its happi-  
ness.

*Observations very useful.*

Follow diligently your Corn harvest, cut down yone  
wheat and Rye, Mow Barley and Oates, put off your  
Sheep and Cattel, gather your Plums, Apples,  
Pears; make your Summer Perry and Cyder, set  
up slips and Scyons of all sorts of Gillyflowers, and  
other flowers; Transplant them that were set in the  
spring. Geld your Lambs, carry Manure from your  
stables put your Swine to the early mast. Refraine  
excess in eating and drinking, drink that which is  
best.

## A Prognostication

### September, *Astrological Observations.*

**R**eligion and Law are still striding not onely to sublist; but also to live: the more sober part of the Nation are for the reforming both: the more unconstant and giddy people are Enemies to their very Being: God send we be not wholly given over to their rash and inconsiderate Wills and pleasure. Some fall this Moneth, and go to their Graves the wrong way.

### *Observations very useful and necessary.*

Cut your Beans, Pease, and all manner of Pulse: in the Land you intend to sow Wheat and Rye, bestow the best manure; gather your winter fruit, sell your wood stocks of Bees, and other commodities you intend to put off. Hatch your hve of Bees you intend to keep, and look that no Dioans, Wice, or other vermin be about them. Thrash your seed, Wheat and Rye. Use Physick moderately, shun the eating of sweet or rotten fruit, avoid unseiting.

### October, *Astrological Observations.*

**T**he Souldiers having endeavoured to win up their Ends with their Superiours are frustrated, which hath necessitated to apply themselves to popular Aid, the People, amongst whom they have no great share of affection. Every Intreperagly to live: The City of London is not inconsiderable in this Game: God preserve it from fire; Merchants suffer by Pyracies.

for the year, 1666.

*Observations very useful and profitable.*

Finish with your Wheat-seed, plash and lay your hedges and quicksets, scowle your Ditches and Ponds, transplant and remove all manner of fruit trees, make Winter Perry and Cyder, spare your Pasture and feed upon your corn fields: draw furrows to drain: and keep dry your new sown Corn: make Malt, reap all new false Calves, all foals that were foaled in the Spring weane from the Mares. Sell your sheep that you do not intend to winter, and separate Lambs from the Ewes that you intend to keep. Recreate your spirits by harmless sports, and take physick by good advice if need be.

*November, Astrolgical Observations.*

[It is more than ordinary, if (before this time) the Dutch and we are not by the Ears: Some Embassage sent to us, that doth not a little please: But let what will happen, the Patient shall out-live the present Miseries. We hope the next year shall produce better News on all hands: the vigilancy of some shall very much contribute to our future happiness.

*Observations for the good Husbands and good Housewives.*

Cut down your Timber for Plows, Carts, Wives, Areltrees, Harrows, and other offices about husbandry, or housewifery; make the last crop of grasse feed Cattel, take your swine from the mast, and feed them to the slaughter: Reap all Calves that fall now, break all Hemp and Flax you intend to spend in the winter season. Remove fruit trees, and sow Wheat and Rye in hot soyls: Use spices and wine moderately.

*December*

## A Prognostication

### December. *Astrological Observations.*

**S**ince I first writ, I have had nothing but sad Tidings, Changes, and Overturnings to prognosticate: I hope this year will determine of those dangers, that we shall be no more subject to those uncertainties, which are the bringers forth of Misery and Want to this Nation. Further consideration is had this Month about Religion and Law; But I fear me, the Law will suffer more then Religion; for God will take a peculiar care of his Name, which is preserved by Religion. It seemeth to me, he will permit the Lawyers back to be whipt for his Iniquity and Ambidexter Tricks.

### *Observations for the good Husbands and good Housewives.*

Put your Sheep to the Peas ricks, kill your small Oxen and large Hens, lop hedges, sawe your Timber for building, and lay it to season: plow your ground you intend to sow clean Beans on; cover your dainty fruit trees, drain your corn fields, and water your Meadows: cover your best Flowers with rotten horse-litter. Now all sorts of Fowle are in season, keep thy self warm with a wholesome Dye, and avoid all care that shall trouble thy Spirit, as a dangerous thing.
